

Navigation Tips

GPS and Web Mapping Software by Freeance-TDC

Accessing the Software on the web

<http://demo.freeance.com/freeance/Client/PublicAccess1/index.html?appconfig=SR2S>

Zoom in using the toolbars on the left side or search for gps point to zoom to area

Review GPS points recorded

click on the Search button, GPS points,

type MH in the logger area,

then you will get a list of points,

goto bottom of list and click on “[show results on map](#)”

you can go to a specific point by selecting the “zoom to” option in the left column.

Accessing the Software on the Blackberry

Look for a symbol like the one below. The GPS Collector software will have a C by it and the MapViewer will have a M next to the symbol.

Click wheel to bring up menu

Select pointer, will give a pointer to indicate where to zoom

Use wheel to move pointer up and down, hold shift key and move wheel to go side to side
