

## Software Download Instructions

### Blackberry GPS Software by Freeance-TDC

Using your Blackberry, open the Internet browser and go to [wap.freeance.com](http://wap.freeance.com) (no www.)

Select the MapViewer app and install over your existing app if asked.  
**Important: if asked to allow "http connection" click the "all" box.**  
Reboot phone if asked.

Next open the MapViewer app. It will be on you main screen or under applations. Now load the new MapViewer profile in the setup screen:

MapViewer:

Freeance URL: <http://demo3.freeance.com/freeancemobile/>

Profile name: SR2S

Connection: Auto

Note: If your org is running a Blackberry Enterprise Server (BES) than set your Connection to MDS. If you get a HTTP connect error this is a solution.

You can do the same with the GPS Collector app. However, unless you have a 7520 or a GPS Bluetooth puck you cannot get GPS points

GPSCollector:

Freeance URL: <http://demo3.freeance.com/freeancemobile/>

Profile: sr2s

### Accessing the Software

Look for a symbol like the one below. The GPS Collector software will have a C by it and the Viewer will have a V next to the symbol.

See the file navigation tips for help on using the software.
